

MAKE SURE WE SUBMIT PDF 2 AND 3

Abstract

- Background story for introduction
- Requirements
- Analysis
- Design
- evaluation/testing
- Conclusion
- Each section must use appropriate UML diagrams
 - Labeled and referenced
- User manual / guide
- Link to issue tracking
- Video
 - Implementation and functionality
 - Show what you are selling
 - Justify the quality assurance process you took
 - Video of 3 distinct use cases by each member
- Complete application with user interface and user input validation
- Test documentation and JUnit testing
- Code documentation (JavaDoc)
- Timecards report (Gantt Chart)
- Revised iteration 2 - Suggested point redistribution
 - Done on form, now just must be actually completed
- Implementation / Runnable as JAR Final Deliverable
 - Code quality matters (comments/formatting/coupling/cohesion)
- Roster of hours per team member--> THIS IS THE ABSOLUTE LAST THING TO BE UPDATED
- Results from git analysis (how many commits, each member commits, List of git contributions)

USECASES
